SPEECH OF HON. JAMES GUTHRIE IN THESEN. ATE OF THE UNITED STATES, FEBRUARY 2, 1866—SLAVERY DESTROYED AND THE CONSTI-

MR PRESIDENT: I have a very distinct conviction in my mind that this bill is not warranted by the Constitution, and is not warranted by good policy and sound statesmanship; but at this hour I cannot do justice to the subject uor to mysell by going into it. However, I will make a few remarks to satisfy the gentiums from Illinois that my objections to this will make a few remarks to satisfy the gentium from Illinois that my objections to this bill are well founded, and such as I believe In, and such as I believe the country will come to. It is sow nine months since the war has ceased. The rebellion has been croshed. The adoption of the amendment to the Constitution by the requisite number of States has been amounced by the only authority that had the right to announce It, the Secretary of State. But before it was announced this bill was concocled, not exactly in its present form, and it has been progressive, changing like the chameleon.

Now, what is the prefense for the passage of the bill? It is found in the Constitutional mendment abodishing slavery in these words "Neither slavery nor involuntary servitude." earty cha! I have been duly convicted, shall enter the United States, or in any place subject the projection?"

The nation has accepted that amendment; it is the language of the nation. My dectrine is that slaver, exists no longer in this country; that it is impossible to exist in the face of that provision: and with slavery fell the laws of all the States providing for slavery—every one of them. I do not see what benefit can arise from repealing them by this bill, because if they are not repealed by the Constitution as amended this bill could not repeal them. I hope that all the States in which slavery formerly existed will accept that constitutional provision in good faith. I myself accept it in good faith. Believing that all the laws anthorizing slavery have fallen, I have advised the people of Kentneky, and I would advise all the State, to put the sa Africans upon the same footing that the whites Africans upon the same footing that the whites are in relation to civil rights. They have all the rights that were formerly accorded to the free colored population in all the States just a

The first section of this bill attempts to repeal all the State laws and to cnact new laws for them, the enforcement of which is put in new hands: and the fourth section creates an army of luformers and sples to seek out those who offend against this law, and to prosecute them at the expense of the United States. SIr, if I know myself, I am determined, in carrying ont the amendment of the Constitution, to do as equal justice to the biack man as to the white man in all respects; but I am not willing to believe, and I do not believe, that there is any suthority under it to overtorn the state governments, and permitting the Federal Government to run into the States to make laws on this subject when it enters into the female appared so effectually as to deceive the project into the belief that he was really a woman. This bill, and the one passed last week, invoke military power everywhere, and throw the protection of the military over anything. Gentlemen, is that a proper answer to this war, to the gallattry of our officers and soldiers, and to the hope of the American people that we should have a restored Union? Is it a proper answer to those who have lent you their money, and whom you yet owe, to sow this cause of discension between the States, this pestering interference that will lead to classension, and God knows what else it will lead to? ARREST OF AN EMBEZZIER.-Officer Spanid ng, of the City Police Department, yesterday ted a young man named Enoch G. Smith, ho was committed to jail, and will have an ali probability be thence remanded to custody of the United States Marshal of this The prisoner is charged with ember valuable letters from the post-office in city, where he was until recently employed clerk. Saspicion had rested a pon him for time before his arrest, but the cirsee of his guilt growing more apparent by Officer Spaulding, at the request

Mr. J. H. H. Woodward, claim agent, on nter street. Major Campbell, a Paymaster this post, had made frequent remittances of ney through the Post-office to his wife at sums thus forwarded failed to reach their ated for until, a short while ago, the Major ted in the office a letter and check for to the address of his wife. This letter was ed by 8mith, and, finding he could not ly make use of the check, he put it a new envelope, and redirected it Mrs. Campbell. The false superscription was at once noticed by Mrs. C., who reed the envelope to the Major for his examiion. On presentation of the handwriting to en. Speed, the Postmaster, and others in the fice, it was identified as that of the suspected lerk, Smlth. A few days subsequent to this tion, Smith applied for an increase of for his services in the department, which ing rejected, he gave up his situation. He was afterward engaged in the claim agency of Kr. Woodward, above mentioned. While in the employ of Mr. Woodward, young Smith was with the delivery and collection of the mail for the agency, and while this reility was confided to him numerous plaints of the non-receipt of money by the ore of Mr. Woodward were made. The as the probable cause of these failures in to do with the receipt or transmission ters. But even after this prohibition, Smith ras suspected of having purloined valuable lettailed to us anthentically: otherwise we would making them public. will be one of vast interest to the State, as well as of extreme pleasure to all who shall be in attendance. We shall hear from numerous officers a verbal statement of what they saw and did in the great war, speeches will constitute a reliable and important portion of the history of the times, of which the historian will gladly take advantage. Thus the historic annals of our noble Commonwealth will receive an invaluable contribution. The officers and soldiers will derive, also, the highest pleasure from the social reunion, after sharing together would earnestly urge every Kentucky soidier to be present. The hospitality of Louis ville will prove sufficient to embrace them all. WEATHER.—The coldness of the weath-

THEFT OF MONEY .- Yesterday morning, E. Carter and Francis W. C. McClain, two gentlemen of Irish birth and decided bacchanalian proclivities, found Mrs. Kingsley's boardingtiver, to be a marvellously snug place-a tiptop retreat from the cruel freaks of old Boreas. They took all sorts of privileges with the afore said house and its proprietress, amongst others Lat of dosing Mrs. K. with inordinate quantities of the "invisible spirit," which so befuddled her that the merry guests made a comp de grace of their pastime by filching from her the sum of thirty-five dollars. Officers Jesse Hammond and Enlow stole in upon their ceremonics. It is needless to say that Carter and McClain are in jail, yet we do say it for the sake of history.

In our advertising columns this morning will be found a card headed " Notice to Contractors," from Mr. J. G. Baxter, President of the Board of Managers of the House of Refuge in this city. Down on KRENO. - This popular and fascing ing game had thriven numolested in our city until night before last. A posse of policemea headed by Lieut. John Lamborn, raided int the precincts of one or two of the keenos and befiscated the fortune-wheel and other appa ratus. The proprietors were called up before the City Judge yesterday, and gave bond to anewer any indictment that may be found against them. As suggested by one of our confreres yesterday, we think it would be well for the police authorities to pay similar attention to the other and worse gaming places about town. We should like to see a fluttering among the 'tigers" and their concomitan nisances. Extend the good work of abolition Mr. Mavor.

PROFITS OF PROTECTION.-A few days ago a statement appeared in the Hartford Times that the Thread Works at Williamantic, Conn, are the most extensive in the country, and that their new mill, four hundred feet long, five stories high and built of granite, costly as it is, was built of the company's profits of over three hundred per cent without disturbing their capital. which is now a million of dollars. ville denot to the corner of First and Main

The editorof the Times further remarke that "thread that used to cost the needleman four cents a spool now costs ten tre same as the imported English thread of J & l'. Coats. One reason why Coats's thread works more emoothly on the mathine, and is better liked than ours, is in the et that the greater dampness of the English mate is mere favorable than our dry air to olnring cotton. Again, the highly electric conion of the atmosphere of the western world probably unfavorable to the necessary comcineas and smoothness songht for in the fubrication of this article: the strands and fibers being more inclined to rough up and 'tly off.'

We find the following pertinent remarks in etter to the New York Evening Post on the ef fect of high protective duties as shown in the present instance:

Here is a manu'acture which, from physical causes, cannot be bronght to perfection la this country, but which, by enormous protection, has been made to pay three hundred per cent profit. Specific and advalvem duties have been piled upon each other to keep out the better goods made in climates adapted to this delicate work. The tariff on imported threads has been raised until it is equal to excently per cent on the cost. The tax on domestic is six per cent, and all this difference is for the fostering of such enterprises as this, whereby a single company has within the past three years accumulated a milition of dollars, besides building a very coefly factory. Who pays for it? The poor needlewomen of the United States, the millions who have to patch and darn to make their old clothes hold out through these times of high prices. But for the tariff the best of threads would now, while gold is 140, be sold at six center a apool.

This does not show the whole extent of the protection. In England the three-cord glazed threads, such as are made by this company, cost threads, such as are made by this company, cost threads, such as are made by this company, cost threads, such as are made by this company, cost threads, such as are made by this company, cost threads, such as are made by this company, cost threads are prefetched the service received.

are a protected, the sewing-woman must ave as much for the one as for the other. The revenue of the country has also suffered to file up this three hundred per cent of profits. spoof cotton need to pay an annual revenue of that a million in gold into the treasury, now the am unit is much less. Such protection as this robs the revenue and crobs the poor, but it pays the lineky few three hundred per cent.

RAILROAD ENTURPRISES IN NORTH MISSIS rri.-The people in the Northeastern corne of Mississlppl have recently nudertaken two ailroad eaterprises, which, when completed. will do much toward the development of the rescurces of that acction. One of these is a road from luka, on the Memphis and Charleston rallroad, in Tishomingo county, to a point the Tennessee river below Eastport, and near the mouth of Yellow Creek, about twelve miles distant from the first-named place. it is proposed by the Directors to raise among the wholesale merchants and other moneyed men f St. Louis, Calro, Evansville, and Cincinnati the funds necessary to build and equip the road which they are confident they will be able to do, as, in their opinion, the amount will not exceed one hundred and fifty thousand dollars. Dr. Davis, the President of the Company, has addressed a circular to the merchants and man. nfacturers of the cities named, in which he clearly and forcibly sets forth the advantager hey would reap from the road, in the large increase of their trade with North Mississippl and the rich section of Alabama lying immediately

South of the Tennessee. Inka is a pleasant and prosperous village and its citizens are generally men of energy and enterprise. The road which they propose o bni'd will cost less in its construction than the same length of road ordina liv does, from the fact that neither deep cuts nor heavy fills will have to be encoantered, the route being pearly level for the entire distance.

The second enterprise referenced to is a road em Corinth to Hamburg, on the Tennessee ver, for which a charter was secured, before he war, we believe, and a part of the grading done. The length of the road will be some eighteen or twenty miles. Corinth must be ome, at no very distant day, a point of con lerable business and importance, standing, as t does, at the crosslag of two of the greatest of our Scuthern railroads. Its citizens cialm hat it is destined to become another Atlanta ln the rapidity of its growth and the magaltude of s business. The road which they propose to build to the Tennessee will do much to bring about that end.

Mayor to reimburse the sum of \$80.70 to Messrs. Hipwell and Martz, that amount having been required of them by the Freedmen's Bareau for the discharge of their duty. Referied.

The Council then adjourned to Thursday, March 1st.

Supermacy of the Freedmen's Bureau—Entraordinate Decision—For two of three days past an interesting suit has been pending between our civil authorities and the Freedmen's Burean. It is one present purpose only to make a plain statement of the facts. On Sunday evening last, Officers Hipwell and Martz, of the Police Department, arrested a disorderly negro woman and prosented her before the Jadge of the City Cout. Her offense was that of running against and who had recognized him procured passage fo him as far as Louisville, Keutneky, on his wa on Nashville, whiter he said he would go and affort his relatives. He had applied to the President, but he refused to aid him by giving him any appointment. The unbottuacie old man was Mr Walker, the isther of the "graveyed man of decitiv," who perished as a fill-buster come years ago buster some years ago.

The foregoing, we undertake to eav, is uttarly false. Mr. Walker, the father of the "graye cd man of destiny," is In this city, where he has been quietly living with a relative for sev eral years past in very feeble health. The old centieman is beloved and respected by all who know him. His recnniary circumstances though not affluent, have always been comfortable. The New York fetter-writer ha been gressly imposed upon, as also was the centleman who had kindness enough to give the poor theatrical door-keeper money sufficient to secure his passage to this city. A GREAT SHOW-STORM-TRAINS DELAYED AL

LONG THE ROADS.—One of the severest snow. orms that has ever visited Indiana, says the New Albany Commercial of Thursday, occurred in the northern part of this State yesterday. Many trains were delayed, others were prevented from leaving, and a general breakng up of travel occurred. Disputches resived by Mr. Masten, SuperIntendent of ie L. N. A. & C. railroad, indicate that the storm is hardly surpassed by that bich visited this State two years ago. A train which left LaFayette yesterday m ag, when twenty miles south of Michigan Clay, was snowed in and stopped. The freight rain from Mlehigan City, yesterday morning, was snowed in at Francesville. The mall train dne at LaFayette at 1.10 P. M. yesterday, had not arrived at Francesville last night at 10 o'clock The freight train, bound north from lcomington, is now snow-bound south of Cor win. The Greencastle train is detalacd at LaFav eite en account of a heavy snow. The mail train which should have left LaFavette esterday afternoon, at four o'clock, could not leave, and all trains north of LaFavette have een abandened. The mail train that left here esterday morning is snowed in at Crawfords ville. The storm, at a late hour last night, was still raging with great fury and the weather was the coldest of the season, rendering all work on the roads next to impossible. Efforts will be continued to get the trains through as fast a he tracks can be cleared, but it is a work great d.fficulty.

After all, the Russian cold snap we are accing through, and which is passing through us, is not unbeneficial. It makes our pedes trians pedestrianize with health-giving momen tum. We observed several usually slow-paced citizens "fairly dusting" along the flags and paves vesterday. The man, or woman, or beast that could go it in the poke-easy gait has need of phy. Move about lively.

The Committee on Southern Railroad held

ng in variety, extent, and value those con-ained in any other portion of the United

States.

There is a large increase in the production and mauu'acture of cotton.

Five thousand miles of raliroads have been built la the South, and a much larger amount the North.

The leagth of the road now necessary is less

han one half, as originally contemplated.

Our population, business, and ability have increased. Ohlo is much the largest and most pavi The Ohlo is much the largest and most navigable river emanating west from the Allegheay Mountains, and represents more coal, iron, and petroleum than are contained in all England. This clay stands at the base of all these, and midway between Lake Erie and the Gulf of Mexico, and the food-producing reglou of the Northwest and the cotton fields of the South; and no where on this earth cas all the elements be found for the manufacture of cotton and distribution of its products superior, if equal, to the banks of the Onio river, or along time incoming the contemplated railroad.

Some diversity of opinion exists as to its proper roue or direction, but with those who have given this subject a thorough investigation, there is a great unanimity of opinion. The indications of nature are unmistakable. The base line of the waters of the great valley is the Missassippi river; and to include and transport, then, it occupies the lower level, runs parallel with the mountains, and by its cornse proclaims to the inhabitants of the vastered

rnns parallel with the mountains, and by its course proclaims to the inhabitants of the vast region it represents, the legitlmate and proper direction for the great bulk of their trade and intercourse; and notwithstanding all contra-actine lefters, this result can not be perminently avoided.

la the new world, as well as the old, it will

be found the enduring course of the great ma-jority of tinde is perpendicular to the parallel-of fatitude, thas affording greater variety and of latitude, this abording greater variety and diminished distances. A shilread South, from this city, to be in conformity with nature and the proper development of the immense resources on either side of its lise, should occupy such lower level as will favor connections from the mineral regions on its eastern side by natural descending grades, and from the west, offering all possible facilities. It should be, in fact, a great trunk lise.

and from the west, offering all possible facilities. It should be, in fact, a great trunk line. To inaugurate this work successfuly, such line of policy should be adopted, as will seem epublic layer and confidency; otherwise all efforts will result as heretofore.

We have the abbity, but, in view of the great increase in the cast of labor and materials and diminished value of railroad securities, induced by increased, ataxation, it is plain, old financial systems, which include hypothecations and the end cast train of sacrifices, induced by poverty and want of cedit, must be abandoned.

This read, it possible, should sell no bonds, but be built with cash. And to do this it is only necessary to contribute such amount as will make its stock beyond peradventure, first-class, and this contribution should be made by the indirect beneficiaries. Two millions of dolians is for this purpose required, and it is expected of the Queen City that she will now awake to the importance of this enterprise, and by the interaction and expectations of those whose interests are identical. BARREN COUNTY ITEMS .- From the Glasgow

Weekly Times of yesterday From Mr. R. B. Evans, Clerk of our County Court, just returned from the new well on the Hammer farm, we learn that the recent strike is promising most handsomely. They are pumping very successfully, with the result of a conant increase of yield. This is likely to be one of the best wells on Boyd's Creek, and will rield the proprietors most handsome profits We learn that it is their intention to put down several wells early in the spring. They have a large body of land contiguous to the spot where they are boring, and it is their pinion that other points on their territory are as promising as this. Other valuable lands in the neighborhood will be bored as soon as the weather will admit of active operations.

The strike on Beaver Creek is undoubted and that the yield will be remnarative is equally sure. But the annoyance in getting the nmps to work is intolerable. As often as they get properly to work something breaks, a seed bag gives way, or some accident occurs, necessitating a suspension. Never haffled, however, the operatives keep trying, knowing they have found the oil, and that perseverance will bring it to the surface. This well is on the Rit ter farm, and belongs to the Cave City and Home Company

To the Associated Press New YORK, Feb. 15 New York, Feb. 15
The Werld's Washington special says the special committee on the debts of the loyal states had another session to-day, for the purpose of determining the basis of the apportionment to which each State is entitled. It appears that Miscowil in the civil says in the same than Miscowil in the same than the eare that Missourl is not disposed to accept er apportionment, she claiming some millions our tinan the examittee are willing to allow er. The matter will be resumed again to-The Ways and Means Committee have re-

must tell the perpetrators of it to be on lasstantly, with their entire crew of mercenary gents.

The idea of invading Mexico was originally had enough, but its results have been even worse then the original conception. Do the generous, liberty-loving French people know that their gellmat brothers in the army have been fighting in Mexico to force upon a free people a system of social government which makes all workingmen the laves of their comployers? Frenchmen are not lovers of suvery, and it will be a bitter draught for them to swallow when they learn that their flag, and their soldiers, and their money are employed to establish slavery npon soil which has been free for generations, and make slaves of a people who have not known what slavery was, except from the lates told them by runaway slaves from the Utited States, to whom they always gave a Christian welcome.

The decree of Maximilian making serfs of the greater part of the Mexican people, is relsing a storm against him in England. The London Times as nead, favors the Archdule; it is loval to only one thing, human tondage, but the ways and Means Committee have repassed the Commissioner of Customs to propasse a bill abolishing the offlees of Sprveyor
ad Naval Officer. The Commissioner, in a report which he submitted to the committee,
nowed to their satisfaction that these offices
and be abolished, not only without any detricent to the service, but with a very great savg to the Government. They are regarded as
ene sincures, and onght to be dispensed
lih. with.

The Senate Judiciary Committee had under consideration to day Senator Howard's bill reorganizing the judiciary of the United States. This bill drifters very materially from the bill introduced by Senators Doolittle and Henderson.

Into the differs very materially from the bill introduced by Senators Doolittle and Henderson. It vests all authority and jurisdiction in the Circuit Court of the United States, in the District Courts of the United States, abolishing the former. It provides for the establishment, in each of the former, circuits of the United States Court, to be called the Court of Appeals, which shall have jurisdiction of all cases arising in the several District Courts within said circuits respectively, but not original jurisdiction.

The Times's Washington special says: The United States Court of Claims to-day decided the case of Pierce vs. the United States, involving the validity of the Floyd acceptances. The decision is adverse to the claimant. The opinion of the Court is that these acceptances were s not bound to pay them, although they are in he hands of the bona fide holders. Over \$1,700,000, involved in this and other cases, is rependent upon the result of the above de-

The Tribune's Washington special says it is reported to day, and seems to be believed by many, that Mr. Bancroft is a candidate for the Custom-House in New York. It is believed even by some who are generally supposed to be in the confidence of the administration. Mr. Sewaid gave a dinner yesterday, to which the members of the diplomatic corps and other distinguished individuals were invited.
